Faucets Collections

A perfect combination of precision technology and innovative design defines Roca's bathroom and kitchen faucets. Never before have there been so many possibilities — from colour, shape, finish and size — designed to appeal to a range of tastes and styles. Sustainability and safety are integrated into every faucet; non-toxic, highly resistant finishes such as Everlux PVD allow for a long life span, while energy saving systems such as Cold Start and advanced basin aerators limit and monitor water flow, giving each user peace of mind.

Sustainability and safety are integrated into every faucet

Key Benefits

Durability. Exclusive ceramic cartridge, which allows a soft and precise operation, with the guarantee of one million opening and closing movements.

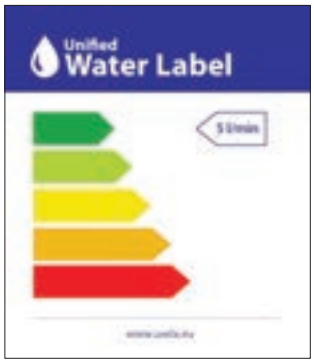

Water conservation. The latest generation of flow limiters offers a flow rate of 5 L/min, regardless of the pressure system, with water savings of 60%*.

Homogeneous flow. Aerators with excellent aerated jet quality, even under complex pressure conditions. They feature anti-limescale protection for easy cleaning and maintenance.

Adaptability. Five heights for basin faucets (SX, S, M, L, and XL in one piece) to provide greater user-friendliness.

Acoustic control. Sound reduction system integrated into the cartridges and faucets to limit the noise of the water.

Safety. Protective filters included in the aerators that stop any particles coming through from the mains.

Technologies

Cold Start

Energy savings. Basin models feature Cold Start, cold water opening that guarantees energy savings of 45%*.

Finishes

Evershine

A high-quality chrome outer layer guarantees a permanent shine and makes cleaning easier.

Matt finishes

Polyester thermosetting powder coating based on polyester resins, resistant to external agents, UV radiation and corrosion.

Everlux

Sophisticated. Exclusive and trendy coating that adds distinction and uniqueness to the bathroom.

Sustainable. Purely physical technique that does not require harmful chemicals or generate water pollution during its production process.

Resistant. Additional layer over the chrome plating consisting of noble and very hard metals that ensure the surface is extraordinarily resistant to scratches and cleaning products.

*Based on annual savings for a family of 4, considering 2 minutes per day of toothbrushing and handwashing 5 times a day.

Water Label

Many of our products are registered with the European Unified Water Label scheme, widely used across Europe to classify and promote water-efficient products. For WCs, the Unified Water Label assesses water efficiency based on the average flush volume. For dual flush systems, the average is calculated from one full flush and three reduced flushes. The rating system ranges from an average flush volume of 3.50 litres or less (Band 1), to a flush volume of more than 6 litres (Band 5).

A Perfect Fit

Five sizes, endless options

When it comes to selecting the perfect faucet for your bathroom or kitchen, size matters. Faucets are available in a range of sizes, each designed to suit specific needs and spaces. From the compact and space-saving XS faucets to the grand and stylish XL faucets, there is a size to cater to every requirement and aesthetic preference.

S-Size. Small to medium-sized faucets, comfortable and appropriate for most standard bathrooms.

M-Size. Medium-sized faucets, versatile and suitable for a wide range of basin sizes. Perfect balance between functionality and style, with a higher body and longer spout.

L-Size. L-Size faucets are larger than the average faucet, with side handle and high spout. Useful for washing or filling large glasses or bowls.

XL-Size. XL faucets are the largest and most stylish type of faucets available, for use with over countertop basins.

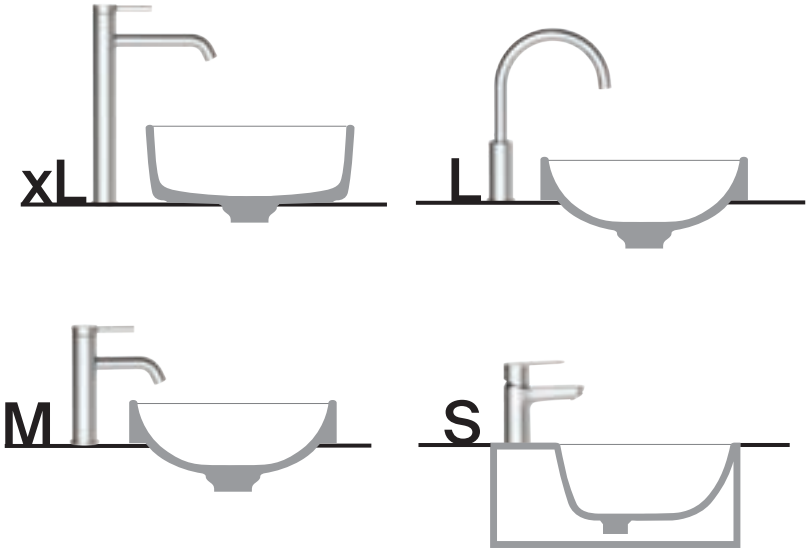

Compatibility with different basins (basin models and basin installation types)

XL-Size
Fit for over countertop basins.

L-Size
Fit for medium / large wall-hung or countertop basins.

M-Size
Fit for standard / medium sized wall-hung or countertop basins.

S-Size
Fit for standard wall-hung, countertop or undercountertop basins.
